

Human Osteocrin, recombinant

Description

A DNA sequence encoding the mature human Osteocrin (Met¹-Gly¹³³) with 6 His tag on the N-Terminus was expressed in *E.Coli*. This protein was purified by Ni-NTA column.

Formulation

Lyophilized 100 µg human osteocrin in 50 µl of TBS (20 mM Tris, 50mM NaCl, pH8.0). Carry free.

Reconstitution & Storage

Add 500 µl deionized water to the vial to prepare a working stock solution at 200 µg/mL. Allow to set at least 30 minutes at 4 °C, mix well.

Store lyophilized protein at -20 °C or -70 °C. Lyophilized protein is stable

for up to 6 months from date of receipt at -20 °C to -70 °C. Upon reconstitution, this protein can be stored at -20 °C for a few weeks or at -70 °C in a manual defrost freezer for long term storage (six months). Aliquot reconstituted protein to avoid repeated freezing / thawing cycles.

Sequence:

human Osteocrin (Met¹-Gly¹³³)

Order Information

Code No.: 00012-01-100
Name: Osteocrin (Human)
Lot No.: 000064
Size: 100 µg
Source: E. Coli
Tag: 6 x His Tag on N-Terminal
Purity: >95% in SDS-PAGE
Formulation: TBS lyophilized Form, carry free
Storage: -20 °C
Application: BA, ELISA
Protein ID: Swiss P61366
Gene ID: 344901
MW: 14.03 KDa
